EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Shiela Loggins on 6/5/2009.

The application has been amended as follows:

SPECIFICATION:

On p 1 of the Specification below the title, the following has been entered:

--This application is a 371 of PCT/GB03/02534, filed 06/12/2003 which claims the benefit of British Application No. 0213424.5, filed 06/12/2002.--

CLAIMS:

In Claim 12, the words "paper or sized" have been deleted and the words --sized paper or-- inserted therefor.

In Claim 15, the words "comprising paper or board and a sizing composition" have been deleted.

In Claim 17, the word "comprising" has been deleted and the word --comprises-- inserted therefor.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the nearest prior art, Fakoukakis et al, teaches an alkenyl succinic anhydride product (ASA) having substantially no polymeric residue and having residual maleic anhydride and olefins distilled off, but fails to teach the olefin content of the purified product. Ward et al teaches that the olefin content of ASA is typically reduced by distillation to less than 3% (US 2006/0231223, pp 3-4, pars 39-40). Another reference teaches that, after stripping, there is no detectable maleic anhydride and nominally 2% residual olefin (EPA publication 201-16228A, "Higher Alkenyl Succinic Anhydride (ASA) CATEGORY JUSTIFICATION and TEST PLAN," 2006, p 10, last paragraph [online], [retrieved on 2009-06-04], retrieved from the Internet <URL: <http://www.epa.gov/hpv/pubs/summaries/hialksan/c16228tp.pdf>>. An ASA having the claimed residual polymeric and residual olefin content is not taught in the prior art and would not have been obvious to one of ordinary skill in the art.

Regarding the sized paper or board in Claims 1, 10 and 14, the data provided in the Declaration by Dr. Sundberg on 4/7/2008 (see p 3, Table 4) show that the Cobb value of paper sized with ASA decreases with decreasing olefin content, thus demonstrating that reducing the olefin content changes the structure of the sized paper. Since the ASA having reduced olefin content is not disclosed or obvious over the cited prior art and the structure of the sized paper is a function of the olefin content, paper sized with the product would not have been obvious.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
